

eXtend

664 & 664PRO

overlock machines

OVERLOCKING MADE SIMPLE

Experience the world of overlockers with easier operation than you ever thought possible! The elna eXtend 664 and 664PRO will allow you to neatly cut, hem and sew in one step, all this with the help of user-friendly tools:

- handy and clearly marked dials for adjusting the stitch length and the differential feed
- color-coded threading guide
- easy-threading system device for lower looper

SWISS DESIGN SOLUTIONS

The elna-exclusive reference panel on the eXtend 664PRO clearly shows the required settings for the selected stitch program. A practical user guide to set up your overlocker step-by-step and to sew perfect stitches for a professional looking result.

Ideal thread tension adjustment and foot pressure control will enable you to easily handle a variety of fabrics including the most difficult and lightweight ones, such as jersey, silk or fine voile.

ADDED-VALUE DETAILS

A functional waste tray can be attached to the machine and helps you keep your sewing area tidy by catching fabric off-cuts and trimmed threads while you work. It is a standard accessory with the 664PRO and optional for the 664.

You will also love the compartment that is integrated into the front of the machine for storing the most frequently used accessories (664PRO) or the convenient accessory case (664).

eXtend 664 & 664PRO
